

Bhargava Sreekantham

PRODUCT ENGINEERING | APPLIED AI | DATA SYSTEMS

bhargava.sreekantham@gmail.com | bhargava-portfolio-opal.vercel.app

Product and data developer with experience directing AI-assisted engineering across a mobile nutrition platform, PostgreSQL-backed services, and AWS workflows. Brings data science training and healthcare operations experience to requirements, data quality, testing, and production troubleshooting.

Marble Product Engineering

Product & Data Developer | Miloza / Marble Nutrition LLC | Jan 2025–Present

Own product requirements and technical direction, coordinating implementation with AI coding agents, reviewing changes, and defining validation and release criteria.

- Directed mobile launch improvements that reduced splash-image assets from 68.91 MB to 6.19 MB (91%) while preserving authentication, readiness checks, and the intended transition timing.
- Strengthened database release checks by replaying 115 migrations on a fresh PostgreSQL database, checking schema drift, and validating that a deliberately broken migration blocked the workflow.
- Shaped an asynchronous recipe-import workflow using S3, SQS, transcription, and LLM extraction; normalized ingredients and surfaced estimated nutrition values for review.
- Improved search with PostgreSQL trigram indexes and stable pagination; a synthetic no-match account query decreased from 263 ms to 0.05 ms in recorded benchmarks.
- Directed media-pipeline and meal-planning consistency work covering retry-safe processing, versioned media, transaction boundaries, and regression checks across saved data and mobile views.

Earlier Experience

Lead Medical Scribe, Cardiology | Providence Health & Services | Sep 2019–Jan 2023

- Coordinated Epic documentation and workflow changes with physicians during the shift to virtual care; translated clinical requirements into consistent visit-routing and documentation practices.
- Trained new scribes, reviewed chart completeness, and resolved documentation gaps with clinical and operations teams.

Medical Scribe, Hospitalist Division | Providence Health & Services | Jul 2017–Sep 2019

- Maintained accurate encounter records in Epic and Care Everywhere, reconciled chart details, and supported reliable handoffs across multidisciplinary care teams.

Research Assistant | OHSU Knight Cancer Institute | Jun 2015–Jun 2017

- Organized and analyzed experimental data for oncology research; supported quality checks, protocol documentation, and clear summaries for research meetings.

Technical Skills

Data: SQL, PostgreSQL, Python, pandas, NumPy, scikit-learn, ETL, data validation

Product systems: React Native / Expo, Express, Prisma, APIs, AWS S3, SQS, Lambda, RDS

Engineering practice: AI-assisted development, technical specifications, CI/CD, integration testing, query analysis, production troubleshooting

Education

University of California, Los Angeles | 2025

Master of Applied Statistics and Data Science (MASDS)

B.S., Biology; B.S., Public Health | Portland State University
